

RISK ASSESSMENT FOR – Kidspac Romford Group Visits Risk Assessment

SUBJECT: Kidspac Romford Groups Risk Assessment

Assessment Dates: 2024

This risk assessment has been written to assist you in writing your own Risk Assessment for your upcoming trip. This generic assessment covers the site risks but does not assess the specific requirements, abilities, medical or physical abilities of your group. We would encourage the group organiser to visit Kidspac Romford to undertake your own assessment, this can be prebooked via our Contact Centre.

- **The Escapade Group does not accept liability for any omissions to this list.**
- **The control measures indicated are recommendations only and must be adapted / amended by group organisers.**
- **Please ensure adequate supervisors are appointed for the number in your group.**
- **Supervision is required at all times and there is strictly no climbing on the barriers / fencing**
- **At Kidspac, there are many uneven surfaces and staircases of various widths, so care must be taken when moving around the site.**
- **Guests must use handrails where provided and running must be discouraged when moving around the site.**
- **Some attractions may not be suitable for children or those of a nervous disposition.**
- **Group leaders are responsible for ensuring all supervising adults are competent and understand their roles. Plan and use suitable group control measures (for example, buddy systems, large group split into smaller groups each with named leaders, identification systems). Discuss the itinerary and arrangements prior to arrival / departure points.**

All risk assessments will be reviewed annually, unless they are no longer valid, there is a significant change or following an accident or incident.

Version Number: V1.0

RISK ASSESSMENT FOR – Kidspace Romford Group Visits Risk Assessment

Risk Matrix								
Risk rating guidance	Likelihood (L)	5	5	10	15	20	25	Likelihood (L) x Severity (S) = Risk Rating (RR).
		4	4	8	12	16	20	
		3	3	6	9	12	15	
		2	2	4	6	8	10	
		1	1	2	3	4	5	
				1	2	3	4	
	Severity (S)							
Acceptability of risk guidance	High-risk: 15 – 25	High-risk activities should cease immediately. Further effective control measures to mitigate risks must be introduced.						
	Medium-risk: 8 – 12	Medium - risks are an acceptable level based on the reduced likelihood after sufficient control measures are implemented						
	Low-risk: 1-6	Low-risks are largely acceptable. Where it is reasonable to do so, efforts should be made to reduce risks further.						
Guidance. When completing a risk assessment, you should:	Identify the persons at risk and the significant hazards. Calculate an initial RR for the activity. Identify risk control measures that reduce the risks to an acceptable level. Calculate a revised RR - you should consider how much safer the task will be if the control measures are followed. Here, you should consider changing both the likelihood (L) and the severity (S) ratings.							
Note. Ideally, you should look to reduce the risks so that the task can be classified as “low-risk”. The total risk scores are a multiplication factor of the calculated Likelihood and Severity. Both Likelihood and Severity are given a number between 1 - 5 as shown on the matrix below and these two numbers are then multiplied together to give the total risk score. Total risk scores can be divided in both directions, i.e. a total risk score of 12 could be a Likelihood (3) x Severity (4) or Likelihood (4) x Severity (3).								

All risk assessments will be reviewed annually, unless they are no longer valid, there is a significant change or following an accident or incident.

RISK ASSESSMENT FOR – Kidspace Romford Group Visits Risk Assessment

Likelihood	Definition	Points rating
Very High	Very High probability if the situation is not addressed an accident is almost certain.	5
High	High probability an accident is probable without any added factor	4
Moderate	Moderate probability an incident is foreseeable.	3
Low	Some probability, requires a combination of factors to take place.	2
Very Low	No significant probability; lightning strike, freak accident.	1

Severity	Definition	Points rating
Very High	Severe injury involving a potential life changing injury or fatality	5
High	Serious injury including concussions or fracture of long bones	4
Moderate	Injury requiring medical intervention e.g. cuts requiring stitches	3
Low	Minor injury, laceration or bruising requiring first aid only	2
Very Low	No injury likely e.g. damaged or soiled clothing, minor bruising, grazes	1

All risk assessments will be reviewed annually, unless they are no longer valid, there is a significant change or following an accident or incident.
